Lead Manager's Commentary as at 31.03.23

The Conservative ISA returned 0.3% over the first quarter of 2023 and **-14.6%** over the last 12 months.

Performance was driven by both asset allocation and stock selection. We hold a neutral weighting in fixed-interest/corporate bonds. Our best performing funds over the quarter being Jupiter Strategic Bond Fund and Royal London Corporate Bond Fund.

The Conservative ISA holds a neutral weighting to equities. Outperformers in the quarter included Mercantile Trust, EdenTree Responsible and Sustainable UK Equity Opportunities Fund, 3i Group Trust and Artemis Positive Future Fund. Underperformers included Slater Growth Fund, Edinburgh Worldwide Trust and Scottish Mortgage Trust.

We are overweight alternative assets. Our best performing commercial property holding was Londonmetric Property REIT and our best performing alternative was Empiric Student Property.

No new holdings were established in the quarter. Two positions were exited in the quarter, 3i Infrastructure Trust and First Trust Cloud Computing ETF.

The Conservative ISA is defensively positioned as the extended period of low interest rates and benign credit conditions comes to an end. We favour alternative income producing assets, with some inflation protection and a balanced exposure to UK & International equities and corporate debt, whilst retaining a minimal weighting to direct sovereign debt.
